## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- 1. (Original) A composition comprising an aqueous dispersion of a fluorochemical compound and a cationic surfactant wherein the composition further comprises colloidal inorganic particles.
- 2. (Original) A composition according to claim 1 wherein said colloidal inorganic particles are cationic colloidal inorganic particles.
- 3. (Currently Amended) A composition according to claim 1 or 2 wherein said colloidal inorganic particles have a particle size between about 1 and about 100 nm.
- 4. (Currently Amended) A composition according to claim 2 or 3 wherein said cationic colloidal inorganic particles comprise cationic colloidal silica particles.
- 5. (Currently Amended) A composition according to any of the previous claims 1 wherein the amount of said colloidal inorganic particles is between about 0.25 and about 25 parts by weight per 100 parts by weight of said fluorochemical compound.
- 6. (Currently Amended) A composition according to any of the previous claims 1 wherein the total amount of solids in the composition is between about 0.5 and about 40% by weight.
- 7. (Currently Amended) A composition according to any of the previous claims 1 wherein said cationic surfactant comprises an ammonium surfactant.
- 8. (Currently Amended) A composition according to any of the previous claims 1 wherein said fluorochemical compound comprises a polymer of (a) one or more fluorinated

monomers having a non-fluorinated ethylenically unsaturated group and optionally one or more non-fluorinated monomers.

- 9. (Currently Amended) A composition according to any of the previous claims 1 wherein said composition has a pH of less than 7.
- 10. (Currently Amended) A method of treatment comprising applying a composition as defined in any of claims 1 to 9 to a fibrous substrate.
- 11. (Original) A method according to claim 10 wherein said composition is contained in a bath through which said fibrous substrate is guided so as to apply the composition to said fibrous substrate and wherein said fibrous substrate is guided through one or more rolls.
- 12. (Currently Amended) A method according to any of claims 10 or 11 wherein an effective amount of said fluorochemical compound is applied to said fibrous substrate so as to provide oil- and/or water repellency properties to said fibrous substrate.
- 13. (Currently Amended) A method according to any of claims 11 to 12 10 wherein said fibrous substrate comprises textile or a non-woven fabric.
